EL CERRITO, CA 94530

EDUCATION and CERTIFICATIONS

Cal Poly San Luis Obispo, College of Engineering | San Luis Obispo, CA

Sept 2018 - June 2024

Bachelor of Science in **Computer Engineering**, Asian Studies Minor

- Relevant Coursework: Interactive Entertainment Engineering (Unity), Computer Graphics (OpenGL, C++, and GLSL), Capstone (Unity), Senior Project (Unity)

Amazon Junior Software Developer Professional Certificate

Amazon, April 2025

WORK EXPERIENCE

Founding Engineer – *EIEN Studios* | Remote

March 2025 – Present

- Promoted from Game Developer for technical ownership, leadership, and cross-functional impact
- Contribute to core engineering decisions, gameplay systems, and overall project architecture
- Collaborate closely with design and art teams to scope, implement, and polish interactive features

Game Developer – *EIEN Studios* | Remote

June 2024 – Mar 2025

- Developed a mobile rhythm game in Unity with real-time, audio-synchronized gameplay
- Implemented Unity audio, VFX, parallax systems, and optimized asset workflows using Addressables

Unity Game Developer – *TheNetVR* | Remote

Dec 2025 – Present

- Leading development of the mobile iOS/Android versions of a social interaction VR game in Unity, focusing on smooth gameplay and responsive touch controls
 - Implementing mobile gameplay systems, input handling, and real-time interactions optimized for iOS/Android devices
 - Optimizing memory, load times, and runtime performance on iOS/Android hardware
-

PROJECTS

Founding Game Developer – *Network Steam Game* | Remote

Jan 2023 – Present

- Developed a 2D top-down multiplayer shooter using Unity, C#, Steamworks, and Mirror
- Engineered core game mechanics and multiplayer features, collaborating with artists to integrate assets and maintain visual style
- Designed tilemaps and gameplay mechanics to create engaging levels and player experiences

Lead AR Unity Developer – *AR Battery Safety App (Capstone & Senior Project)* | Cal Poly & EPRI, San Luis Obispo, CA

Sept 2023 – June 2024

- Built an AR iOS/desktop app in Unity with C# and ARKit, visualizing critical safety data from Google Sheets
 - Mentored teammates on Unity workflows and delivered client-ready solutions using Agile practices
-

SKILLS

Game Development: Unity (2D/3D), Unity Addressables, Unity Animator, Parallax Scrolling, Asset Integration, ARKit, Multiplayer (Mirror), Shader Programming, OpenGL, GLSL

Programming Languages: C#, C++, C, Java, Python, JavaScript, SQL

Tools & Environments: Git, GitHub, VSCode, Xcode, UNIX/Linux

Development Practices: Agile/Scrum, Unit Testing, CI/CD

Design & Prototyping: Figma, Google Suite, Microsoft Suite
